**EXPERIENCE:**

Mar 98 to Present - Responsible for staff advisory and manage quality assurance of Civil Works Programs for the POD and its Districts. Manage the POD's Continuing Authority Program, Floodplain Management Program, Planning Assistance to the States and General Investigation programs. Also responsible for oversight, technical and policy guidance of the Division's Civil Works program; covering, engineering, environmental restoration and planning functions. Member of the Tri-Service CADD/GIS Center, Systems Field Working Group and a member of the Corps of Engineers Specification Steering Committee.

Jun 88 to Mar 98 - Responsible for staff advisory and review of the POD's Military Construction and Civil Works planning, design and construction functions. Prepared & reviewed feasibility reports, technical environmental and civil engineering design journals, and conducted environmental and civil design seminars and Command briefings. Reviewed and directed project managers in their development of scope of works, government estimates, and negotiation with Architect-Engineers for design contracts and reviewed construction request for fee proposal contracts. Served as the Division's personal computer Decision Support Coordinator, and on the Corps of Engineers Civil Field Action CADD group, and the Tri-Service CADD/GIS Center, Systems Field Working Group.

Jan 85 to Jun 88 – POD's Project Manager responsible for managing and coordinating funding, A-E contracts, and in-house military projects and responsible for conducting Division Command briefings. Formulated and prepared programming documents, and managed the master planning, energy (EEAP), hazardous waste management (DERA, IRP, and DERP), and the wastewater and water programs. Responsible for supervisory and management of one secretary and five professional engineers.

May 83 to Jan 85 - Served with the US Eighth Army (EUSA) as Chief of the Northern Region, Engineering, Planning and Services. Responsible for managing, planning and coordinating the programming, engineering and military construction activities for the three Northern Directorates of Public Works. Managed and supervised forty-five architects, engineers, cost estimators, master planners, surveyors, and administrative personnel. Selected as the construction officer representative for the Northern Region. Became the principal technical advisor for environmental and civil engineering issues within the Command. Served as the Director of Public Works for Camp Casey for six months; supervising over 100 personnel in support of the operation, maintenance, and new construction for that installation.

Sep 75 to May 83 - Responsible for POD's Civil & Environmental designs of Military & Civil Work construction projects; including preparing design scope of works, specifications, and negotiating contracts for Architect-Engineer services. Prepared an environmental technical paper (Biological Treatment of Wastewater in Saline Conditions) for submission to the Water Environmental Federation.

Aug 73 to Sep 75 – Served as a Civil Engineer for POD's Planning Division. Prepared an Urban Study report for the Kaneohe Watershed basin and preliminary designs for the overflow channel and interior road and utility infrastructure for the Kaneohe Dam project.
